

Pre-Lat and Public Testing of the Election Equipment

October 30, 2024

5:00 pm

Town Hall

W698 County Road DD

Neshkoro, WI

Before each election, the Clerk conducts a thorough testing of the ImageCast Evolution tabulator to ensure accurate vote tabulation on Election Day.

Following the testing of the machine, the Clerk securely seals the ballot box and scanner with tamper-evident seals, each marked with unique serial numbers. These serial numbers are documented during the public test. On Election Day, poll workers verify the serial numbers as they open the polls.

Cheryl Milbrandt

Town Clerk
